MY PROFILE

High-end, performance-focused **Django Full-Stack Web Developer** dedicated to engineering bulletproof, high-converting digital products for global startups and businesses. By combining strict backend logic with beautiful, responsive frontend frameworks, I deliver complete apps optimized for speed and market traction. Backed by ongoing academic specialization in **Cybersecurity at LAUTECH**, I inject protective coding standards and data resilience into every architecture, guaranteeing apps that scale cleanly under real-world pressure.

FLAGSHIP APPLICATIONS

TradeSphere – Multi-Vendor Marketplace FREELANCE PIPELINE
Django, DRF, PostgreSQL, Stripe Connect, React, Tailwind

- **Architecture:** Engineered a rigorous multi-tenant system with isolated vendor portals, concrete live database indexing, and interactive vendor dashboards.
- **Financial Engine:** Integrated complex Stripe Connect payment architecture to orchestrate automated transaction splits, safe payouts, and instant webhook handling.
- **Performance ROI:** Streamlined the onboarding process by **40%** while proving architectural stability under heavy load tests mimicking 500+ daily transactions.

PostFlow – AI-Powered Content Scheduler SAAS MVP BUILD
Django, Celery, Redis, OpenAI API, React, Material UI

- **AI Core:** Programmed a beautiful SaaS orchestration tool that leverages the OpenAI API to dynamically process caption copywriting and context-aware image suggestions.
- **Queue Processing:** Configured a highly responsive backend worker cluster utilizing Celery and Redis to continuously dispatch up to **10k+ automated daily posts**.
- **Product Velocity:** Saved target beta users an estimated **70% of content production time** during initial testing across an active group of 200+ accounts.

MediBoard – Hospital Management Suite SIMULATION SYSTEM
Django, Channels (WebSockets), PostgreSQL, React, Chart.js

- **Systems Engineering:** Built an end-to-end medical operations environment tracking encrypted electronic data, live clinical shifting, and immediate bookings.
- **Asynchronous Flow:** Leveraged Django Channels and persistent WebSockets to create fluid, real-time telemetry representing medical bed occupancy instantly.
- **Security Layer:** Lowered latency for critical data queries by **35%** by mapping multi-tier database roles, securing medical records from unauthorized vectors.

EstatePro – Real Estate CRM & Portal ENTERPRISE PROJECT
Django, DRF, Next.js, Supabase, Tailwind, Vercel

- **Product Framework:** Formulated an elegant, user-facing search engine linked to a fully integrated lead management CRM for agency scalability.
- **Automation Pipelines:** Wrote complex spatial coordinate lookup functions and automated event-driven real-time lead distribution algorithms.
- **Scalability Matrix:** Maintained lightning-fast UI execution speeds during concurrency load testing involving **10k+ unique active real estate records**.

EDUCATION

Ladoke Akintola University of Technology (LAUTECH)
Bachelor of Technology (B.Tech) in Cybersecurity Studies
Target Domain: Secure Web Frameworks, Defensive Application Logic, Database Networks, Cryptographic Architecture.
