- Rest API

SECURITY & WORKFLOW

- Cybersecurity Fundamentals
- Secure Coding Practices
- API Design & Auth
- Rapid MVP Prototyping
- CI/CD Basics
- UI/UX Collaboration

LANGUAGES

English — Fluent / Professional

AVAILABILITY

Open to freelance projects and full-time remote roles.

PROFILE

Full-stack developer specializing in Django and React, currently completing a B.Tech in Cybersecurity at Ladoke Akintola University of Technology (LAUTECH). I own the architecture and technical decisions on every build data models, API design, and security and use modern tooling, including AI-assisted development, to implement and ship quickly. Focused on clean, secure, production-style code and fast MVP delivery for early-stage products.

SELECTED PROJECTS

TradeSphere — Multi-Vendor Marketplace *(Personal Build)*

Django · DRF · PostgreSQL · Stripe Connect · React · Tailwind

Multi-tenant marketplace architecture with isolated vendor dashboards and Stripe Connect payment splitting for automated vendor payouts.

PostFlow — AI-Powered Content Scheduler *(Personal Build)*

Django · Celery · Redis · OpenAI API · React

Async scheduling platform built on Celery/Redis task queues, using the OpenAI API to generate and queue social content on a per-channel basis.

MediBoard — Hospital Management Suite *(Personal Build)*

Django Channels · PostgreSQL · React · Chart.js

Real-time operations simulation using Django Channels and WebSockets for live bed occupancy tracking and clinical scheduling.

EstatePro — Real Estate CRM & Portal *(Personal Build)*

Django · DRF · Next.js · Supabase · Tailwind

Property listing portal with an integrated CRM, spatial search, and automated lead-routing logic.

EDUCATION

Ladoke Akintola University of Technology (LAUTECH)

B.Tech in Cybersecurity Studies __ In Progress

Focus: Secure Web Frameworks · Defensive Application Logic · Database Security · Cryptographic Architecture
